## SAMTEC RELEASES NEW FULL LINE INTERCONNECT SOLUTIONS CATALOG

Samtec, Inc., a worldwide leader in the manufacture of electronic interconnect solutions, is pleased to announce the release of its new 2010 Full Line Catalog. This latest edition boasts nearly 400 pages detailing Samtec's extensive line of interconnect products and services designed for routing signals when signal integrity, pin mapping, Electromagnetic Interference, rugged, or harsh environments, and/or power requirements present design challenges.

Samtec is continually expanding its product lines and services to meet or exceed current technology and industry demands. In addition to dozens of new or enhanced products, the F-210 Full Line Catalog includes an extensive guide to the new interactive Sudden Circuits® Solutionator™ for designing high speed flex data links. Also included are expanded features on High Speed Micro Backplane products, the popular rugged Tiger Eye™ family, and express modification engineered custom capabilities.

Samtec's comprehensive line of interconnect solutions is supported with integrated global service, manufacturing and quality strategies along with its renowned Sudden Service® ensuring the highest quality products, service, and information.

To receive your copy of Samtec's F-210 Full Line catalog contact Samtec, Inc. P.O. Box 1147 New Albany, IN 47151. Phone: 800-SAMTEC-9 (800-726-8329)
